Education

University of Texas at Arlington

Master of Science in Information Systems

Jan 2025 - Dec 2026

Saitribai Phule Pune University

BE Mechanical Engineering

Aug 2017 - Jun 2021

Experience

Graduate Teaching Assistant - The University of Texas at Arlington

Arlington, TX, US

Aug 2025 – Present

- Assisting faculty in grading assignments, exams, and projects with accuracy and consistency.
- Conducting office hours to provide academic support and clarify course concepts for students.
- Facilitating classroom activities, discussions, and technology setup to enhance learning outcomes.
- Supporting course administration, including managing course materials, records, and communications.
- Guiding students in research, projects, and use of academic resources to strengthen understanding.
- Collaborating with professors and fellow GTAs to ensure smooth course delivery.

Senior Systems Engineer — Infosys

Pune, India

Dec 2021 – May 2024

- Worked on SAP BW/HANA architecture for finance and procurement analytics.
- Optimized BW objects and ETL components for ECC finance data integration.
- Developed and tuned SAP HANA calculation views for real-time AR and finance reporting.
- Built and optimized ETL pipelines to ensure accurate, consistent, and reliable BI data
- Streamlined ETL pipelines integrating enterprise data, reducing report generation from hours to minutes.
- Modeled data using fact/dimension tables and star schema for scalable analytics.
- Created and maintained Tableau and SAP dashboards, converting AR data into actionable insights.
- Collaborated in Agile sprints, managing planning, grooming, and iterative dashboard releases.
- Handled system transports and deployments across development, QA, and production environments.
- Mentored interns on SAP BI architecture, data modeling, and reporting workflows.
- Documented BI architecture, ETL workflows, and reporting standards for governance and knowledge sharing

Skills

Programming: Python, SQL, Java (Basic)

Data Warehousing & Modeling: SAP BW/HANA, Google BigQuery, Data Modeling, Star Schema, Fact/Dimension Tables

Data Pipelines & ETL: ETL Design, Databricks, Data Integration, Data Cleaning, Automation (Python,

GitHub Actions)

Data Visualization: Power BI, Tableau, Google Looker Studio

Version Control & Workflow: Git, GitHub, GitHub Actions **Analytics Methods:** Hypothesis Testing, KPI Analysis, Exploratory Data Analysis **Tools:** SAP ABAP, SAP HANA Studio, MS Office

Projects

Automated E-Commerce Pricing & Performance Analytics Dashboard

- Built an end-to-end Python + Power BI analytics pipeline with GitHub Actions automation, applying hypothesis testing to determine optimal pricing strategies

Social Media Addiction Risk Modeling & Analytical Dashboard

- Developed a KNN/Softmax ML model to predict addiction risk scores and built a 5-dashboard Tableau solution segmenting users across platforms, age groups, and geographies.

Office Supplies Inc. — Enterprise Database Design

- Designed and implemented a 4NF-normalised Oracle SQL database from scratch — covering ER diagrams, relational schema, data dictionary, and complex query execution.

Extracurriculars & Certification

IBM Business Intelligence (BI) Analyst Professional Certificate

Introduction to SQL Using Google BigQuery

Python for Everybody - Coursera
