OBJECTIVE

Data Analyst with 3+ years of experience designing and delivering data warehousing, ETL pipelines, and business intelligence solutions in enterprise environments. Skilled across the end-to-end data lifecycle, including data ingestion, modeling, transformation, visualization, and stakeholder reporting. Experienced with Databricks, Google BigQuery, and spreadsheet-based analysis using Microsoft Excel and Google Sheets, along with Google Workspace tools (Docs, Slides, Gmail). Proficient in SQL, Python, Tableau, and Power BI, with a focus on hypothesis-driven analytics and delivering actionable insights in Agile, Git-based team environments.

PROFESSIONAL EXPERIENCE

The University of Texas at Arlington

Aug 2025 – Present

Graduate Teaching Assistant

Arlington, TX

- Assisted faculty in grading assignments, exams, and projects with high accuracy using Google Sheets/Excel for tracking, analysis, and consistency.
- Conducted weekly office hours to support students, clarify complex concepts, and guide use of course tools and resources.
- Managed course administration, including maintaining records, grades, and communications using Google Sheets/Excel to ensure smooth course delivery.

Infosys

Dec 2021 – May 2024

Senior Systems Engineer

Pune, IN

- Designed and optimized SAP BW/HANA architecture and ETL pipelines for ECC finance data, enabling real-time AR and procurement analytics.
- Developed high-performance SAP HANA calculation views and star-schema data models, reducing report generation time from hours to minutes.
- Delivered actionable BI solutions through Tableau and SAP dashboards, transforming enterprise AR data into business insights for decision-making.

SKILLS

Data Warehousing & Modeling : SAP BW/HANA, Google BigQuery, Data Modeling, Star Schema, Fact/Dimension Tables

Data Pipelines & ETL : ETL Design, Databricks, Data Integration, Data Cleaning, Automation (Python, GitHub Actions)

Databases & Querying : SQL, SAP HANA, BigQuery SQL

Data Visualization : Power BI, Tableau, Google Looker Studio

Version Control & Workflow : Git, GitHub, GitHub Actions

Analytics Methods : Hypothesis Testing, KPI Analysis, Exploratory Data Analysis

Programming : Python

Tools : SAP ABAP, SAP HANA Studio, MS Office

EDUCATION

University of Texas at Arlington, TX, USA

Jan 2025 - Dec 2026

Master of Science in Information Systems

CGPA: 3.43

Savitribai Phule Pune University, Maharashtra, India

August 2017 - Apr 2021

Bachelor of Engineering in Mechanical Engineering

CGPA: 3.54

PROJECTS

Automated BI pipeline [🔗](#) | Automated data-to-dashboard pipeline

Jan 2026

- Designed an end-to-end automated data pipeline using Python for ingestion, transformation, and loading into Power BI.
- Implemented GitHub Actions to schedule workflows and enable version-controlled deployment of the analytics pipeline.
- Built data models and interactive Power BI dashboards to track product and category performance for decision-making.

Social Media Addiction Modelling [🔗](#) | Social media addiction risk analytics

Nov 2025

- Built an Addiction Score prediction model using KNN and Softmax Regression on behavioral datasets processed in Excel/Google Sheets.
- Engineered features from usage, sleep, mental health, and academic data, creating a composite Addiction Risk Index combining ML outputs with behavioral factors.
- Developed a 5-dashboard Tableau solution with KPIs and user segmentation, transforming Excel/Sheets data into actionable insights on high-risk platforms, demographics, and usage patterns.
